Only human blood and/or other bodily fluids (urine, saliva, tears, cerebrospinal fluid, etc.) may be used ONLY IF either purchased or obtained from a blood bank, hospital, or laboratory. No blood may be drawn, or other fluids collected from any person specifically for a science project. This rule does not preclude a student making use of data collected from tests run on blood or other fluids that were collected for a purpose other than exclusively for a science project.

Any project involving human teeth must have the teeth sterilized prior to experimentation.

Hairs, nails, and feathers are not needed to be treated as potentially hazardous biological agents.
